

Abstract

A power-operated tool holder adapted to mount a hand tool for actuation thereof. In some embodiments, the tool holder includes a frame having a support adapted to receive a pivot pin, and an actuator coupled to the frame and releasably coupled to the hand tool in a mounted 5 position of the hand tool with respect to the frame. The actuator is movable to actuate at least part of the hand tool about the pivot pin in the mounted position of the hand tool.
